

## Polyethylene label tape

Easily deal with harsh high temperature, low temperature, and outdoor exposure environments

Material: PVC material, environmentally friendly and pollution-free

Product features: waterproof and oil-proof, different sunscreen fading, no glue residue, tear resistance, corrosion resistance solvent, soft surface material, easy to stick to irregular curved surfaces, good outdoor durability.

Certification: Pass ROHS environmental certification

Applicable models: GT1000, GT100, GT2000, GT3000, GT3600

Operating temperature: -30°C~+110°C

Recommended use: outdoor, low temperature, light, laboratory

The WIMA polyethylene label tape can easily cope with harsh high temperature, low temperature, and outdoor exposure environments, keeping the label content clear and not easily falling off. The label comes in different colors such as white, red, yellow, blue, and green. The width of the label tape is 6mm, 10mm, 12mm, 14mm, 18mm, 24mm to choose from.

According to specific needs, it is equipped with label tape consumables of different label types, widths and colors. The label tape has a simple structure and easy installation and operation. The label paper can reduce front and rear blanks and reduce label printing costs. It has the characteristics of waterproof and oil-proof, high and low temperature resistance, corrosion resistance, and has long-term thermal properties.

Polyethylene label tape
